America's Favorite Garage Doors®

# intellicore®

## insulation technology

Clopay Bridgeport™ Steel garage doors featuring Intellicore® insulation technology represent the ultimate smart choice for homeowners. Clopay's Intellicore® insulation is a proprietary polyurethane foam that is injected into our Bridgeport™ Steel doors, expanding to fill the entire structure. The result is a door with incredible strength and durability. Its dense insulation also produces a quieter door, and with one of the industry's leading R-values of 18.4, it provides year-round comfort and improved energy efficiency.

### WARMER

Energy efficiency provides year-round comfort

### QUIETER

Dense insulation reduces noise by up to 16 decibels

### STRONGER

Enhanced strength resists everyday wear and tear

# BRIDGEPORT™ STEEL

## garage doors

Bridgeport™ Steel garage doors combine the traditional symmetry of wood stile and rail door designs with the proven durability of Clopay's three-layer, steel construction. This provides exceptional strength and energy efficiency as well as quiet operation. The 2" or 1-3/8" thickness of Intellicore® polyurethane insulation with a thermal break makes these doors heat and cold resistant while the tongue-and-groove joint helps seal out wind, rain and snow. Available in narrow and extended recessed panel designs with multiple window options, three-layer Bridgeport™ Steel garage doors are virtually maintenance-free making the beautiful look a lasting impression.

### 3-LAYER CONSTRUCTION

- Tongue-and-groove section joints help seal out wind, rain and snow.
- Replaceable vinyl bottom weatherseal in a corrosion-resistant retainer helps seal out the elements.
- 2" and 1-3/8" Intellicore® polyurethane insulation filled doors come standard with 10-ball nylon rollers and heavy-duty 14 gauge steel hinges.
- Prepainted Standard White end stiles and interior steel backing create a clean, finished appearance.
- 2" and 1-3/8" Intellicore® polyurethane insulation filled doors comply with 2015 IECC air infiltration requirement of 0.40 cfm/ft<sup>2</sup> or less (IECC, Section C402.5.2).
